SKY CEILING

DESIGNER Stefan Borselius

CONTENT Core: 100% Polyester
Cover: 100% Trevira CS (Xtreme CS)

THICKNESS 4.7” (120mm)

DIMENSIONS 33.3” x 23.2” (846mm x 591mm)

WEIGHT 2.30 lbs

FLAMMABILITY
EN 13501-1

ACOUSTIC NRC: 0.85 (see graph on following page)

APPLICATION Ceiling

DESCRIPTION Sky is a modular system that weaves convex organic forms into a pattern which visual energy is matched by its capacity to improve a space’s soundscape.

BENEFITS

Ease of Installation: Each panel has four embedded magnets placed 23.5” apart in each corner. This allows Sky to attach to 2’ x 2’ drop-ceiling grids without the need of any hardware.

Improved Sound Absorption: Sky Ceiling is ideal for high frequency absorption and achieves an NRC 0.85 rating when directly fixed to a ceiling grid. Sky Ceiling tiles can be installed in vertical or horizontal arrangements, with either complete coverage or with voids between tiles, due to the tile’s form, scale, and a flexible installation system.

Designed for the Environment: There are no emissions to air, water or land during the production of Sky Ceiling. The sound-absorbent core of Sky contains recycled materials. Sky Ceiling is recyclable.

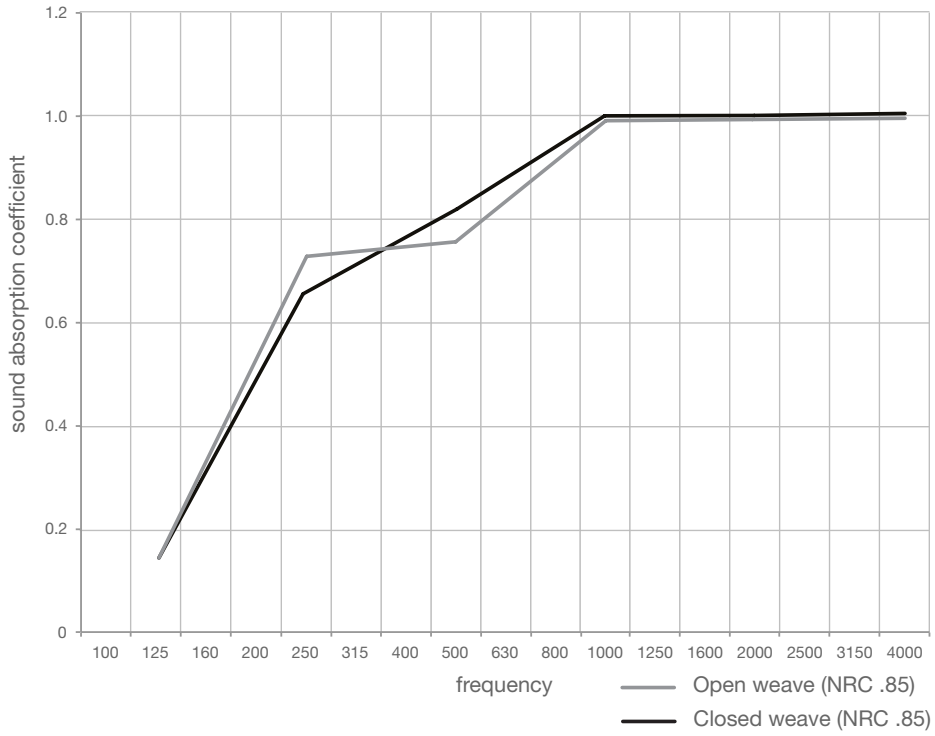
SKY CEILING



CARE

Trevira CS Covering: To preserve the fabric color and appearance of the fabric, Sky should be vacuumed regularly with a soft nozzle.

Polyester Core Stain Removal: Use uncolored paper towel or cloth to soak up as much as possible of the stain. Dried stains should be vacuumed. Moisten the stain lightly with a clean white cotton cloth, lukewarm water and possibly a small amount of pH-neutral detergent. Press a dry cloth or uncolored paper towel against the fabric so that moisture and dirt are absorbed. Repeat moisten and soaking until the stain is gone. Use clean water without detergent at the last moistening. Finish with soaking.
