ECOUSTIC® DUAL PANEL DESIGN INSTRUCTIONS

HOW TO DOWNLOAD YOUR FILES

1. Navigate to the bottom of the Ecoustic® Dual Panel Collection webpage to the Design File Downloads location, directly underneath the Base SC Panel.
2. Select the Panel Design.
3. Once selected, a download screen appears to download the file type needed.
4. Next, select the felt face color from the Face Color- Ecoustic® Felt folder and download your desired face color from the 33 available options.
5. Finally, select your desired Base Color from one of the 20 SC Panel options and repeat the download process with the desired colors.

HOW TO DESIGN ECOUSTIC® DUAL WITH YOUR NEW FILES

1. Import the Base and Face Felt Color files into your preferred modeling program (CAD, Revit, Rhino, etc.). This is done by using the materials manager or similar function.
2. Open the drawing file with your preferred program. In the layer manager you will see two specific drawing layers, one titled Base SC and one titled Felt Face.
3. Apply your desired Base Color to the Base SC layer and Felt Color to the Felt Face layer.
4. Visualize your final product by rendering the colorized model.
